DOWN WITH BARRICADES

As if the sufferings of thousands of Campus Residents and students have not been enough yet to discourage any sensible student movement from using barricades as a form of protest, the KM-SDK are again preparing the minds of the studentry and the academic community for the eventual setting-up of barricades in the University. In an attempt to glamorize the barricades, they are showing BARIKADA - undoubtedly another play that will attempt to incite the students into another tumultuous form of protest.

Are these KM-SDK students so heartless and conscienceless as to forget the untold sufferings experienced by those who live inside-campus during the time of the barricades? Are they forgetting the sleepless nights children had to spend because of the sound of pillboxes indiscriminately thrown by outsiders manning the barricades?

What have the barricades accomplished? Have they really lowered the price of oil? Has it banded the students and the academic community in one united front?

The barricades have not achieved the purpose it was set up for. It has only shown us a glimpse of what is forthcoming when these people get in control. They will be establishing communes. There will be mass looting and indiscriminate slaughter of people. Just like during the barricades, there won't be any rights left for the likes of the ordinary individual.

- PRESERVE FREEDOM, FIGHT OPPRESSION.
- OPPOSE FUTURE BARRICADES.
- PROTEST BARIKADA.
